

Recycle your food waste into compost

Compost it on-site, using a RIDAN composter

All food including meats and cooked food can be composted, quickly, easily and economically. Perfect for schools, hotels, restaurants, businesses, tearooms and canteens.

Supporters of

1

Remove the lid, tip your food waste in, (cut up large chunks, avoid excessive fluids)

2

Add the same volume of woodchip, sawdust or wood pellets

3

Turn the handle until working level is reached

4

Replace the lid and empty the compost which emerges into the maturation box

- Reduce waste disposal costs
- Reduce landfill
- Reduce greenhouse gasses
- Reduce road transport
- Reduce your carbon footprint
- Create compost
- Grow plants and food
- Demonstrate sustainability

All Schools love a Ridan because they are a great way to teach the next generation about caring for our world, avoiding waste, and recycling. Here children from the Eco-club show off their new Ridan at Lainesmead Primary School, Swindon. They have a fantastic kitchen garden where the compost will be well received!

What people say

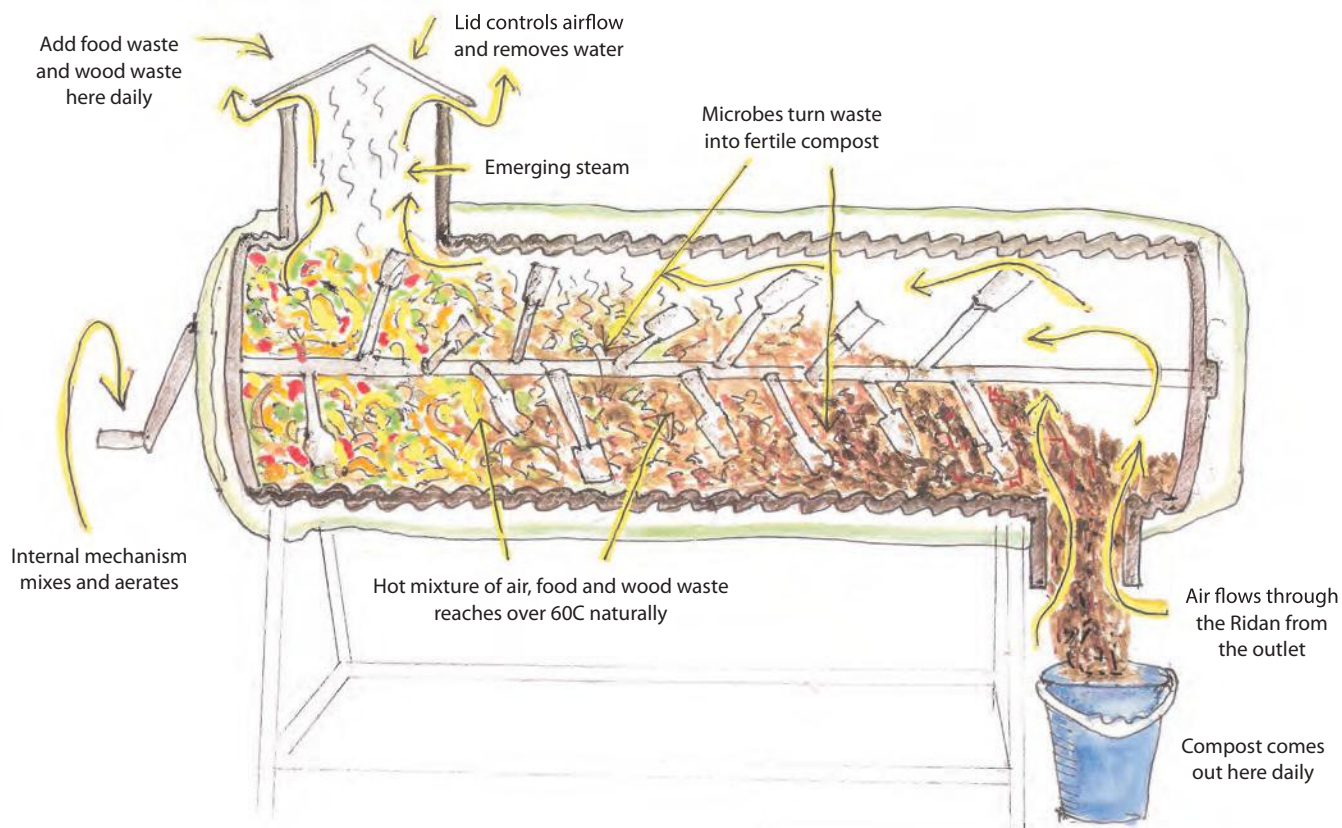

Heather Tarplee of Farms for City Children. (March 2012) "Just to let you know the composter (or dragon as it is known here - green and breathes fire) is a great success. The children love it, we have filled our first settling bin and I have just cancelled a Biffa contract that was costing us over £1000 per year! Thanks very much".

John Roberts, Headteacher at Heswall Primary School the Wirral. (April 2015) "Our ridan composter is working very efficiently, a local carpentry shop is providing wood shavings and we are adding about 10 litres of food waste every day to the composter. Our landfill costs have decreased significantly and we use the compost on our raised beds. Vegetables are then used by our kitchen to produce exciting recipes for the children to try such as apple and blackberry sponge, spicy potato wedges, pea and ham soup, and plum jam - served at our toast club!"

Wayne Hack from Stowford Primary School, Ivybridge "I am amazed at how well the Ridan works, how easy it is to use and how quickly it composts".

Graham Jones, Building Manager at the Angel Building, Islington. (January 2014) "Our Ridan composter is running just nicely. We produce just the right amount of compost to keep our landscape contractor in fertiliser for our surrounding gardens and plants".

How it works

Specifications	Ridan Pro 200	Ridan Pro 400
Maximum Throughput	200 Litres per week	400 Litres per week
Unit Dimensions (meters)	2.4L x 1.0W x 1.5H	2.5L x 1.0W x 1.6H
Unit Weight (empty)	60Kg	70Kg
Price of Ridan	£2950 plus vat	£3650 plus vat
Maturation Boxes	2 @ £360 each plus	3 @ £360 each plus
